

SuperN is Terra Preta's flagship high-nitrogen organic fertilizer — engineered for organic producers, regenerative farmers, and market gardeners who demand **real results without compromise**. At **7.5% total nitrogen** in a certified organic granule, SuperN outperforms most competing organic N sources. With **79.5% organic matter** and a near-neutral pH of 6.42, it fuels the soil biology that feeds your crops — delivering season-long, slow-release nutrition that builds your land with every application. Backed by independent laboratory certification from A&L Canada Laboratories.

GUARANTEED ANALYSIS — LAB CERTIFIED

Total Nitrogen (N)	7.50%
Available Phosphate (P ₂ O ₅)	2.70%
Soluble Potash (K ₂ O)	1.10%
Calcium (Ca)	4.59%
SECONDARY & TRACE ELEMENTS	
Boron (B)	12.78 ppm
Zinc (Zn)	77.04 ppm
Aluminum (Al)	1,771 ppm
PHYSICAL PROPERTIES	
Total Organic Matter	79.54%
pH	6.42
Bulk Density	634 kg/m ³
Moisture	10.42%

RECOMMENDED APPLICATION RATES

CROP / SYSTEM	RATE	TIMING
Market Garden Beds	100–200 g/m ²	Pre-plant, incorporate
Field Vegetables	200–400 kg/ha	Pre-plant or side-dress
Transplant Starter	25–50 g/hole	At transplanting
Grain & Cover Crops	150–300 kg/ha	Pre-plant, broadcast
Perennials / Orchards	300–500 kg/ha	Early spring, drip zone

Always conduct a soil test before application. Rates may be adjusted based on soil nutrient levels and crop demand.

WHY SUPERN WORKS

- Highest-Analysis Organic N Available**
7.5% certified organic nitrogen in a dry granule — more N per kg applied, better economics per unit of nutrition.
- 79.5% Organic Matter — Feeds Your Microbiome**
Nearly 80% organic matter fuels the microbial communities that unlock phosphorus, cycle nutrients, and build stable humus.
- 4.6% Calcium for Cell Integrity & Disease Resistance**
Supports strong cell walls, improves fruit quality, reduces blossom-end rot, and enhances pathogen resistance.
- pH 6.42 — Soil-Safe & Seed-Safe**
Near-neutral pH means no soil acidification, no seed burn. Apply in-furrow, top-dress, or incorporate — it works with your system.
- Slow-Release, Season-Long Nutrition**
Organic nitrogen mineralizes progressively through microbial activity. No flush-and-crash, no leaching — just consistent, reliable nutrition.

HOW TO USE SUPERN

- Soil Test First.** Know your baseline N deficit and crop demand before applying.
- Broadcast & Incorporate.** Apply at recommended rates and incorporate 5–10 cm into soil 1–2 weeks before planting.
- Side-Dress In-Season.** Apply alongside rows during active vegetative growth. Water in thoroughly.
- Pair with Biologicals.** SuperN's high OM makes it an ideal carrier for mycorrhizal inoculants and beneficial bacteria.

IDEAL CROPS: Brassicas · Alliums · Leafy Greens · Sweet Corn · Cucurbits · Tomatoes & Peppers · Potatoes · Cover Crops · Small Grains · Orchards & Vineyards

FOR REVIEW

LAB CERTIFIED
A&L CANADA

ORGANIC
PRODUCTION

Certified for Organic Production. SuperN is formulated for compliance with Canadian Organic Standards (COR/CGSB 32.310) and is submitted for OMRI listing. Certified organic operators should confirm acceptability with their certifying body prior to use. Lab Report No. C26107-20002 · Sample ID: SUPER N · Date Reported: April 23, 2026.

LAB VERIFIED

Every batch independently tested by A&L Canada Laboratories — accredited by the Standards Council of Canada.

REGENERATIVE

Builds soil organic matter, supports soil biology, and improves long-term land productivity.

CANADIAN MADE

Proudly produced in Sundre, Alberta. Supporting local agriculture and reducing supply chain emissions.

HIGH ANALYSIS

More nutrients per kilogram means fewer inputs, lower freight costs, and better economics for your operation.
